CERTIFIED CYBER SECURITY MANAGEMENT PROFESSIONAL (CCSMP) INTRODUCTION

There is a global demand for an industry with highly competent Cyber Security Management Professionals. The perspective of cyber security is approaching the organizations very differently, where to improve the cyber security of the organization. IMRTC recognizing the need and in consultation with senior executives and professionals & approved trainers has come up with a comprehensive certification program.

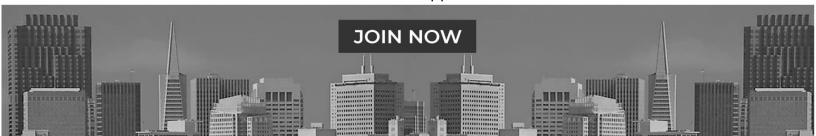

In this respect, IMRTC domain Experts designed a comprehensive training certification, which can provide facilitation to the professionals and also provide the structure to maintain and manage the Cyber Security Management System in the organization. Therefore, with the consultation of senior executives and professionals, and trainers have come up with a comprehensive certification program. **CERTIFIED CYBER SECURITY MANAGEMENT PROFESSIONAL (CCSMP)**

ABOUT CCSMP

CCSMP prepares a Cyber Security Management generalist who will be able to help the organizations maintain the efficiency level as well as to improve the organizational cyber security by giving the inputs to the strategic level. The framework and process will help to grow the organization.

The Certified Cyber Security Management Professional covers all the aspects of Cyber Security Management by using versatile International standards and frameworks and prepares the candidate for real-time cybersecurity engagements as well as practices and purposes. The certification assists and prepares you for the best standards.

The certification ensures that the individuals are fully aware of and follow the Professional Code of Conduct, and will be equipped with the cyber security knowledge and understanding of global standards. Understand business process development & re-engineering requirements, Business & Artificial Intelligence with Data Analysis, Information security systems and electronic equipment integration with information systems, change management systems, portfolio and project management, financial budgeting for Internal Auditing, Global Cyber Security Management and service management through technology and more content is available for learning and development. The program follows a systematic learning format with standards and guidelines, audio-visual aids, and case studies with real-time applications.

CERTIFIED CYBER SECURITY MANAGEMENT PROFESSIONAL (CCSMP)

AUDIENCE

People who are involved in cyber or information security or like to develop their career in the field of cyber security management may join this program. The program is available for whom, who have completed 12th grades accredited study program from any discipline from any Board or University.

THE CREDENTIALS

The candidates who are looking to have appropriate knowledge and understanding of cyber security with the requirements of global industry will earn the Certification of Cyber Security management from IMRTC. The program also a self-develop project base on any case study which can be provided by accredited any partner training institute or trainer of IMRTC of 40 Professional Training Hours (PTH).

The program also requires a self-developed project on any case study provided by an accredited training institute or trainer. The project must be in soft form and submitted to our concerned training partners or chapters for assessment. After approval, the candidate can sit in the final examination of IMRTC.

After passing the certification examination the candidates can use this credential CCSMP-Certified Cyber Security Management Professional after their names.

DOMAIN	6: SECURITY ARCHITECTURE AND DESIGN
Task 1	Understanding of Security Architecture and Design
	Understanding of Principles of Secure Network Design
	Use any case and develop any Security Architecture
Task 2	Understanding Access control management
	Access Control Models
	Identification and Authentication
	Access Control Policies and Enforcement
	Cryptographic Controls in Network Access Management
	Network Access Controls
	Cloud and Remote access Controls
Task 3	Zero Trust Architecture
	Overview of Zero Trust Principles
	Key Components of Zero Trust Architecture
	Network Segmentation
	Endpoint Security
	Data Security
	Security Monitoring and Analytics

DOMAIN 7	7: CYBER THREAT INTELLIGENCE
Task 1	Understanding and threat Intelligence landscapes Intelligence Cycle in CTI Threat Intelligence Sources
Task 2	Threat Intelligence Frameworks and Standards Tools and Platforms for CTI Threat Actor Profiling Indicators of Compromise (IOCs) Threat Hunting Using CTI CTI for Incident Response and Mitigation
Task 3	Monitoring and analyzing security events Leveraging artificial intelligence in threat detection Challenges in Cyber Threat Intelligence

Task 1	Developing Leading team for Cyber Security
	Team management and training
Task 2	Communicating cybersecurity to executive leadership
	Reporting Formats
	Monitoring and Securing Methodologies
	Penetration Testing Report Analysis, Impact and Response Plans
	Vulnerability Assessment Reports and response Plans
Task 3	Budgeting for cybersecurity initiatives
	Meeting formats and budget approvals
	Convincing to higher management regarding cyber security threat and
	budgets requirements.
